

These components have been designed to contribute to the UN Framework Convention on Climate Change Nairobi Work Programme and the National Adaptation Programmes of Action.

Proposed focus countries*

South Asia	Southeast Asia	Africa	
Bhutan	Cambodia	Burkina Faso	Mozambique
Nepal	East Timor(TBD)	Ethiopia	Rwanda
	Laos	Kenya	Tanzania
	Myanmar (TBD)	Mali	Uganda
			Zambia

*Focus countries for country planning meetings may be changed depending on country needs/wishes and political situation

Scoping activities

A key means of developing the long-term programme is through supporting the establishment of national advisory groups. These groups will assess national capacity needs and identify available support, both from the region and more widely, to meet these needs.

During 2008, SEI and START planned to:

- undertake a detailed scoping study in Africa and Asia;

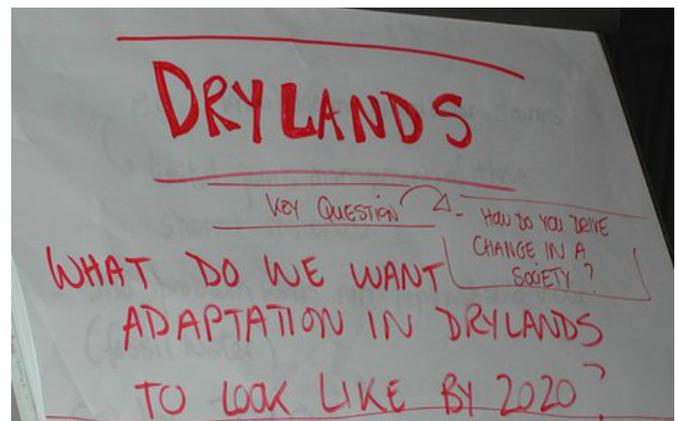

Photo: Clark Seipt

- ascertain the priorities for each country vis-à-vis the programme components;
- identify the travelling faculty, visiting experts, the material and the curricula to be developed; and
- design the format for the fellowship programme and training workshops components for the larger programme of work. Activities will include a regional workshop in Africa and in-country visits to the focus countries in Asia and Africa.

Project staff

Kai Kim Chiang, Matthew Chadwick, Tom Downing, Lisa Schipper, Moliehi Shale and Gina Ziervogel.
