Climate Smart Women Connect: Climate and Gender Justice for Indigenous Women in Asia
Overall Goal
This event will build momentum for a more inclusive climate policy through engagement with indigenous peoples, with a focus on Indigenous Women who are the most dependent on climate-affected livelihoods and play a key role as custodians of territories of life. Through collective actions and consensus building, it will contribute towards Indigenous Women’s empowerment, thereby transforming the power structures that exclude women of different ethnicities from the climate-related policies that affect their lives.

Our research in Cambodia, Vietnam, Laos and Myanmar found that women – particularly indigenous women – are more likely than men to be affected by climate change. Vulnerabilities are rooted in gendered divisions of access and control to the land, labor, and other resources as well as decision making power. Women tend to be the primary caregivers and providers of food and fuel and therefore are more vulnerable to climate change impacts. Oftentimes, men migrate to other communities and to cities for employment opportunities; leaving women to fend for themselves, their children and elders. Despite some positive progress, policy development still excludes the needs and voices of those most affected, including indigenous women. Indigenous women’s agency including their knowledge offer key insights for sustainability and social justice transformations. There is an urgent need that the global governance architecture for climate change addresses the lack of gender balance, sensitivity and responsiveness, and a meaningful recognition of Indigenous Knowledge in order to achieve climate and gender justice.

Objectives
- To build a common understanding among different actors on the impact of climate change on Indigenous Women and their livelihoods.
- To scale up good practices and initiatives on climate change adaptation and livelihoods of Indigenous Women.
- To identify issues that can drive transformation in the inclusion and empowerment of Indigenous Women in the climate policy agenda.

Expected outcomes
1. Stronger women’s voice at all levels of the climate policy regime, with particular inclusion of indigenous women.
2. Increased socio-economic empowerment for women, with particular focus on indigenous women.
3. Increased community resilience to climate shocks and other disasters.

The Organizers

Asia Indigenous Peoples Pact (AIPP)
AIPP is a regional organization founded in 1988 by indigenous peoples’ movements. AIPP is committed to the cause of promoting and defending indigenous peoples’ rights and human rights and articulating issues of relevance to indigenous peoples. At present, AIPP has 48 members from 14 countries in Asia with 18 indigenous peoples’ national networks, 30 local and sub-national organizations.

Cuso International
Cuso International is a not-for-profit development organization that works to eradicate poverty and inequality through the efforts of highly skilled volunteers, collaborative partnerships and compassionate donors.

Gender Development Association (GDA), Laos PDR
GDA is a Laos-based network, formed in 1991 out of a collaboration of the Lao Women’s Union (LWU), UNICEF and various INGOs. GDA works for joint action and awareness to end all forms of gender discrimination, so all individuals can contribute to an equal and just Lao society. GDA is a member organization, with over 20 individuals and organizations across sectors.

Cambodia Indigenous Peoples Organization (CIPO), Cambodia
CIPO was established and registered with Ministry of Interior in 2014. It was born out of the desire to change the destiny of the Cambodian Indigenous Peoples Society to take charge on their culture and tradition and their customary rights to land and natural resources in their community as well as in Cambodia country.

Center for Sustainable Development in Mountainous Areas (CSDM), Vietnam
CSDM is a non-government development organisation, registered under an umbrella of Vietnam Unions for Science and Technology Associations. The mission of CSDM is to (a) improve the quality of life in ethnic communities by ensuring food security through encouraging occupations which are sustainable and environmentally sound; (b) encourage the protection and sustainable management of natural resources according to both indigenous knowledge and modern techniques; (c) revitalise and promote transmission of cultural heritage to the new generation; (d) support, develop and strengthen the capacities of community based organisations and cooperation within and between communities and organisations; and (e) advocate the cause of disadvantaged peoples and ethnic minority groups and co-ordinate with other organisations at national, regional and international levels.

May Doe Kabar (MDK), Myanmar
May Doe Kabar was launched in 2015 with support from the United Nations Development Programme. It creates a channel for realizing the collective voices of rural women for inclusion in local and national policies. May Doe Kabar responds to the current needs and long-term aspirations of rural women to promote the role and leadership of rural women and their contribution to sustainable development and gender equality.
